## **Discover Nature at Spring Break Eco-Discovery Days**

Delta, BC - Two weeks of freedom and fun are on the way, that's what kids are thinking anyway. Parents on the other hand are anxiously wondering how to entertain their exuberant children during the two weeks of Spring Break. Put your mind at ease with Eco-Discovery Days! Presented by DRS Earthwise Society, Eco-Discovery Days are fun, exciting and educational for the kid's and a welcomed break for the parents.

Eco-Discovery Days take place in the McKitrick Earthwise Garden located at 80<sup>th</sup> Ave. and 111<sup>th</sup> Street in North Delta and run Tuesdays and Thursdays during Spring Break (March 12-25) from 1pm – 3pm. Crafts, games and hands-on activities combine with the great atmosphere of the McKitrick Earthwise Garden to make these programs fun as well as a unique outdoor learning experience.

Each afternoon has a different theme with topics ranging from "What Lies Beneath?" on March 14 and "Where are the Wild Things?" on March 16 to "Why are Seeds so Sensational?" on March 21. The theme on March 23 is "How do Hummingbirds Hum" with kids discovering the many talents of these amazing winged visitors. Most hummingbirds overwinter in Mexico, returning to Canada in the spring. Eco-Discovery days are the perfect opportunity for your kids to spot these sparkling garden jewels.

Programs are for kids ages 5-8 and cost \$10 per child per afternoon. To register contact Amanda at 604-946-9828.
